

## Seeded Cards

Scrub Australia's range of seed greeting cards and notecards are handmade from 100% post-consumer paper and are embedded with live seeds. The Gift that keeps on giving, don't throw the card in the rubbish or even the recycling, plant it and watch it grow instead!

### Greeting cards

Greeting cards feature images on the front, with planting instructions on the back. The inside of the cards are blank and each card comes with an envelope also made from 100% post-consumer paper.

Greeting card size: 105mm x 148mm

### Note cards

Note cards are available as a four pack. Each note card has an image on the front, blank on the inside, and has planting instructions on the back.

Note card size: 74mm x 105mm

### Gift Cards

Gift cards come as a pack of eight with each gift card having an image on the front, blank inside and has planting instructions on the back.

Gift card size: 52mm x 74mm

### Seeded Tags

Gift tags come in 3 sizes (small, medium, large). With one side of the tag printed with the seed type together or without one of our images, the other side is left blank. String is provided and tags are available as a set of 10.

Gift tag size: small - 35mm x 100mm, medium - 50mm x 100mm, large - 70mm x 125mm

### Seeded Calendars

Calendars feature all of our current seed types with one seed per month. Simply tear along the perforated line at the end of each month and plant. Our calendars are mounted onto a sturdy 100% post consumer cardboard stand.

Calendar size: 105mm x 105mm

### Seed types

The current range of seeds include:

- Alyssum - a sweetly scented low growing flower
- Swan River Daisy - a native daisy from Western Australia
- Chamomile - an annual herb that produces small flowers
- Oregano - a great herb that can be used in cooking
- Thyme - another herb to add flavour when cooking.

### About our seed cards

Scrub Australia's seed paper contains live seeds and for best results it is important to care for the paper just as you would for seeds from your local nursery. Try not to expose the seed paper to large extremes in temperature, such as direct hot sunlight, or cold frosty areas. Generally, the seeds in the paper will remain live for around 6 to 12 months.
